

Sansol

AUSTR 73602

DISINFECTANT HOSPITAL GRADE

Benefits:

- KILLS HIV [AIDS VIRUS] AND HBV [HEPATITIS VIRUS]
- BACTERICIDAL
- Leaves surfaces sparkling clean
- Kills odour causing BACTERIA

FOR DISINFECTION OF HYGENIC ENVIRONMENTAL SURFACES

Disinfecting Performance:

Sansol is a registered disinfectant, proven to kill Blood Borne Viruses such as HIV [the AIDS Virus], and HBV [Hepatitis B Group Virus].

Sansol is suitable for use on stainless steel and tiled or porcelain surfaces. It is a super high foaming concentrated disinfectant with powerful cleaning ability built into the formulation. *Sansol* should not be applied to painted surfaces or metal surfaces containing aluminium, brass or copper.

Sansol should be used neat for disinfection where blood spillages are routinely present or are at an elevated risk of being present. *Sansol* is also a powerful BACTERICIDAL cleaner and is suitable for use where ever bacterial cross infection is a concern in pathology or functional analytical laboratories.

Sansol is the only product proven to both KILL and clean away serious infectious viruses in those worst case dirty situations that can sometimes be present in health care settings.

FOR FOAM CLEANSING OF HYGENIC ENVIRONMENTAL SURFACES

Cleaning Performance:

For Bathrooms and Washrooms you want to sparkle through thorough hygienic cleansing.

Using *Sansol* through a foaming gun (set at dilution of 1 in 10), reduces labour costs associated with cleaning large bathrooms and shower blocks by 50%. *Sansol* represents a fundamental change in the way hospital bathrooms can be cleaned. The super concentrated high foaming system clings to walls and vertical surfaces. It should be left in place for several minutes and then washed off thoroughly with running water.

The super concentrated cleaning system in *Sansol* effectively removes soap scum, body fats and oils, hard water carbonate deposits, rust and urine stains, dirt and common soils, algae and mildew.

Sansol, even when used as a cleaning product, offers a deeply penetrating cleaning action to remove soils and anti-bacterial action to neutralize mal odours at the source.

Do not apply *Sansol* to painted surfaces. The concentrated mildly acid cleaning system can cause paint to peel or crack, even at dilution. *Sansol* should not be applied to painted surfaces or metal surfaces containing aluminium, brass or copper.

Foaming Gun: The foaming gun automatically dispenses *Sansol* at a 1:10 dilution with water. Apply to the entire bathroom, i.e. walls, floors, showers, sinks, toilets etc. Leave for 5 minutes. In areas of severe build of soap scum etc, lightly scrub with a doodle-bug before washing away. Rinse with water.

HAZARDOUS STATEMENT: *Sansol* IS A HAZARDOUS MATERIAL AS DEFINED BY WORKSAFE AUSTRALIA CRITERIA.

WARNING : USE *Sansol* ONLY AS A FOAMING SPRAY AS FINE MIST COULD IRRITATE NASAL AND UPPER RESPIRATORY MUCOSAL SURFACES AS WELL AS IRRITATING SKIN AND EYES.

RISK: Irritating to eyes. Irritating to skin.

SAFETY: Wear suitable eye/face protection.

SPILLS: Contain with sand or earth. Neutralize with Soda Ash.

FIRST AID: Skin Contact: Wash skin with soap and water. Eyes: Flush with water for at least 15 minutes. Seek medical advice if irritation persists. Ingestion: Do NOT induce vomiting. Give a glass of water. Seek medical advice.

CHEMICAL COMPOSITION AND PROPERTIES

Appearance:	Clear colourless - pale yellow liquid
Colour (concentrate).....	Clear colourless - pale yellow liquid
Colour (dilute solutions).....	Clear colourless - pale yellow liquid
Composition:	Surfactant blend
Detergent System:	Anionic
Odour.....	Characteristic
pH (concentrate)	2-3
PH (diluted solutions 1:10).....	2.5-4.5
Solubility:	Soluble
Rinsibility.....	Total
Abrasives.....	Nil
Hazardous Status.....	Non hazardous
Volatility.....	Nil
Flammability:	Nil
Dangerous Goods Rating.....	Nil
Shelf Life:.....	2 Years

Additional information is listed in the Sansol Material Safety Data Sheet.
