

POLARIS

MULTI-ENZYME DETERGENT

POLARIS is a multi-enzyme, high performance, low foaming detergent which has been designed for the reprocessing of medical devices.

POLARIS is a concentrated formulation for use in washer disinfectors. POLARIS is effective at penetrating and breaking down the most common soils found on medical devices, including protein, fat and carbohydrate-based soils. POLARIS is low-foaming, free rinsing and suitable for use in hard and soft water.

- ✓ Low foaming
- ✓ Excellent materials compatibility with medical instruments
- ✓ Passes multiple commercial soil tests.
- ✓ Complies with the requirements of AS/NZ 4187:2014 and ISO 15883-1:2006
- ✓ Highly effective leaving instruments clean & bright

Effective cleaning of these medical devices is critical prior to disinfection or sterilization in any Sterilising department.
